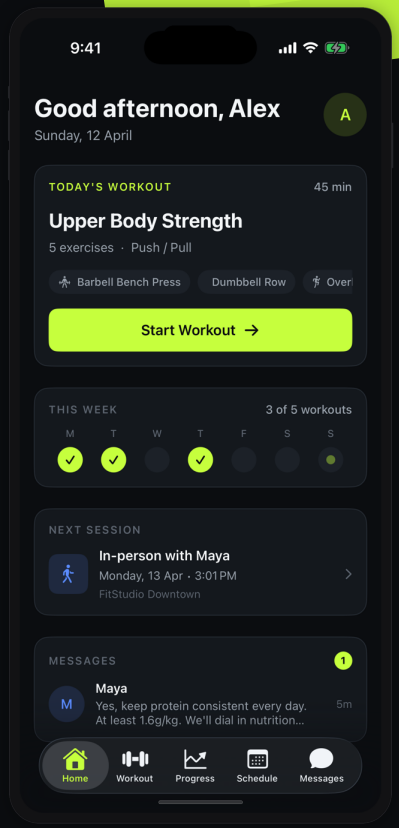
FitHero

The operating system for independent personal trainers.

Partner Briefing | Confidential | April 2026



The Problem

Independent trainers cobble together 5–7 tools to run their business.

- Client communication scattered across WhatsApp, SMS, email
- Programs built in Google Sheets or scribbled on paper
- Scheduling via Calendly, DMs, or verbal agreements
- Payments chased via Revolut links, Venmo, or cash
- Progress tracked in Notion, Notes, or not at all

Our Vision

One beautiful app that replaces everything.

Convenience

Every action a trainer or client needs is **two taps away**.

Programs, payments, scheduling, messaging, and progress — all in one place. No switching apps.

Design Quality

Feels like a **premium consumer app**, not a clunky SMB tool.

Trainers are proud to show it to clients. Clients love using it more than their other fitness apps.

"*Become the default OS for the independent trainer — the way Square became the default for the independent merchant.*"

What FitHero is Not

Focus means saying no. Here's what we deliberately leave out of MVP.

- ✕ No AI features (form check, program generation, chatbot)
- ✕ No group classes or bootcamps
- ✕ No nutrition / meal planning
- ✕ No in-app video calls (use Zoom/Meet links)
- ✕ No marketplace or "find a trainer" directory
- ✕ No social feed, leaderboards, or public profiles
- ✕ No wearable integrations (Apple Health, Garmin)

Why?

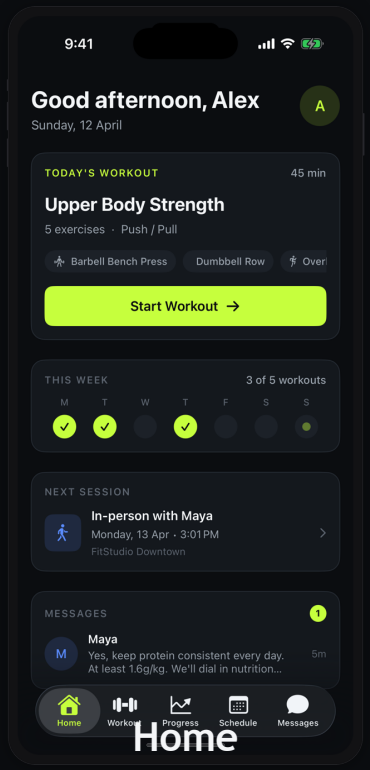
These features are deferred to Phase 2 as paid add-ons.

The MVP core must be:

- **Near-zero cost**
- **Dead simple**
- **Ship fast**

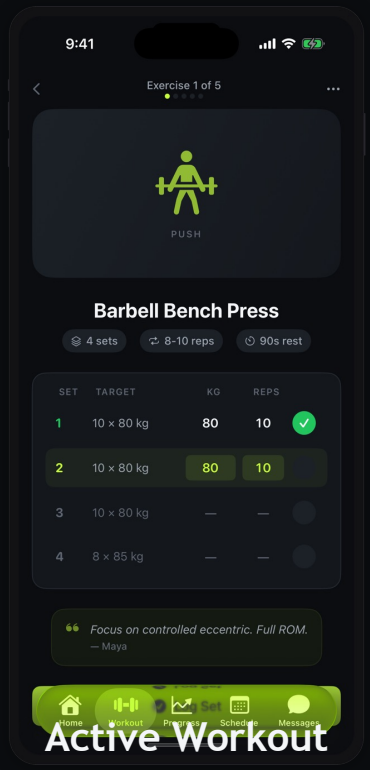
The Client Experience

What your clients see every day — clean, focused, two taps to start training.



Home

Today's workout, schedule,



Active Workout

Log sets, rest timer,

Progress

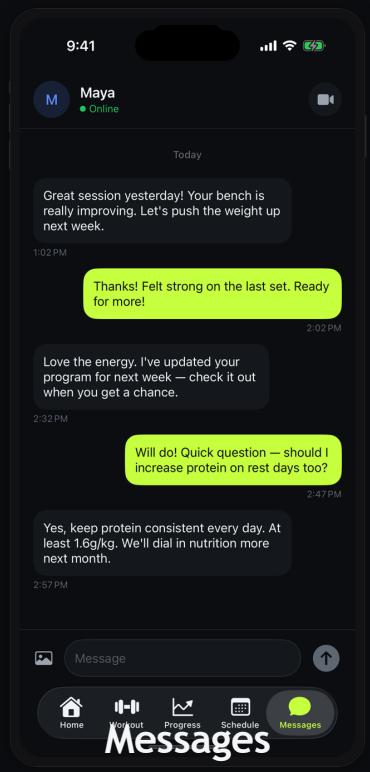
Weight trends, PRs,

Schedule & Communication

Clients book sessions and message their trainer — no WhatsApp needed.

Schedule

Upcoming sessions, reschedule



Messages

1:1 chat with trainer,

The Trainer Side

Trainers get a web dashboard + mobile app to run their entire business.

Client Management

Invite clients, track goals, intake forms, notes. See everything about each client in one profile.

Program Builder

Drag-and-drop workout builder with 300+ exercises. Create once, assign to many. Templates save hours.

Scheduling

Calendar view with 1:1 sessions. In-person, video, or check-in. Clients get notifications + calendar invites.

Payments

Send invoices, set up recurring subscriptions. Clients pay with saved card or Apple Pay. Auto-charge.

Messaging

Built-in 1:1 chat. Push + email notifications. No more scattered WhatsApp threads.

Dashboard

Today's sessions, revenue, pending payments, unread messages — all at a glance when you open the app.

Business Model

The trainer pays. The client never pays FitHero directly.

Solo	Starter	RECOMMENDED Pro	Studio
Free	$19/mo	$39/mo	$79/mo
Up to 3	Up to 15	Up to 40	Up to 100
Acquisition funnel	*$1.27 per client*	*$0.98 per client*	*$0.79 per client*

Additional Revenue Streams

- 1% platform fee on client-to-trainer payments (via Stripe Connect)
- Phase 2: AI add-ons, branded apps, nutrition, wearables, marketplac

"Active client" = logged in or had a workout assigned in the last 30 days. Inactive clients are free. This removes friction for trainers.

MVP Scope

Ship a focused product one trainer can use to fully manage 10–30 clients.

Trainer (Web + Mobile)

- Account setup + Stripe Connect onboarding
- Client invite & management
- Drag-and-drop program builder
- 300+ exercise library
- Calendar scheduling (1:1 sessions)
- 1:1 messaging with push notifications
- Invoicing + subscription billing
- Revenue dashboard

Client (Mobile)

- Accept invite + intake form
- Today's workout with "Start" CTA
- Active workout logging (sets, reps, weight)
- Rest timer + coach notes
- Progress charts + personal records
- Session schedule + reschedule
- 1:1 messaging with trainer
- Payment management + receipts

Phase 2 — What Comes Next

After product-market fit. Each feature is a revenue lever, not a freebie.

AI Program Generation	Auto-create periodized programs from goals + history	$10–20/mo add-on
AI Form Check	Upload a video, get rep-by-rep feedback on technique	$10–20/mo add-on
Nutrition Module	Meal logging, macro targets, food photos	Premium tier
Wearable Sync	Apple Health, Garmin, Whoop — auto-import activity data	Premium tier
Custom Branding	Trainer's logo, colors, and custom app icon for clients	$25/mo add-on
Group Programs	One program for a cohort — bootcamps, challenges, classes	Studio plan
Template Marketplace	Trainers sell programs to other trainers. FitHero takes 15%	Revenue share
Document Signing	PAR-Q forms, liability waivers — built-in, no DocuSign needed	Pro+ plan

Why We Win

The market has tools, but none that trainers actually love using.

Product	Strength	Our Advantage
Trainerize	Mature features	Dated UI, complex, expensive at scale
TrueCoach	Serious coaches	Limited payments, feels like 2018
Everfit	Free tier, AI push	Cluttered, AI-first not coach-first
PT Distinction	Nutrition tools	Steep learning curve, ugly client UX
Spreadsheets + WhatsApp	Free, flexible	The messy status quo we replace

> **Our wedge:** the prettiest, simplest product in the category — with native payment handling — priced for solo trainers.

Why We Need You

We have the product and engineering. You have the domain expertise.

What We Bring

- Product vision and design
- Full engineering team
- Business model + go-to-market strategy
- Design system + working prototype
- Payment infrastructure (Stripe Connect)
- Commitment to ship MVP in 8–12 weeks

What You Bring

- Real-world training experience
- Understanding of what trainers actually need
- Insight into client expectations and pain points
- Validation of features and pricing
- Beta testing with your own client base
- Network access to the trainer community

Questions for You

We'd love your honest input on these before we finalize the MVP.

1. **Is the feature set right?**
   Are we missing something critical that solo trainers can't live without? Is anything here unnecessary?

2. **Is the pricing fair?**
   Would you pay $19–39/mo for this? Would your peers? What's the price sensitivity in this market?

3. **Programs vs. ad-hoc workouts?**
   Do most trainers plan multi-week programs, or do they decide workouts day-by-day? How should the builder work?

4. **Payments — what's reality?**
   How do you currently collect payments? Would built-in billing change your workflow for the better?

5. **Client adoption — what's the barrier?**
   Would your clients actually download and use an app? What would make them resist?

6. **What would make you switch?**
   If you're using something today, what would FitHero need to do to make you move?

Let's Build This Together

FitHero is early-stage and intentionally so.

Your expertise shapes what we build.

Peter — Founder

Let's talk when you're ready.
